ESET Secure Authentication - Mobile App 4.2.1 servicing update

2026-04-29 - Steef | ESET Nederland - Comments (0) - Servicing release

A servicing update of ESET Secure Authentication - Mobile App 4.2.1 has been released.

Users will be receiving the update in a phased manner: only up to 25% of the users will receive the update on the day of the release and we will increase the percentage up to 100% by Monday May 5, 2026.

Changelog

- IMPROVED: EULA replaced with unified Terms of Use, users will be prompted to accept these to continue using the application
- IMPROVED: Updated copyright year to 2026
- ADDED: Support for iOS 26.2.1
- FIXED: Mobile app unavailable on some Android devices (e. g. 32-bit) due to missing runtime identifiers
- FIXED: PIN not submitted after pressing Done on keyboard (Android only)
- FIXED: Allowing access without PIN or biometrics when application opened after a long time (Android only)
- FIXED: Crashes while receiving multiple push notifications (iOS only)
- FIXED: Disappearing push notifications (Android only)
- FIXED: PIN or biometrics sometimes skipped when opening the app via push notification (Android only)
- FIXED: Incorrect PIN label in Dutch localization
- FIXED: Various security and stability fixes
