[ESET Secure Authentication] planned maintenance

2025-04-17 - Steef | ESET Nederland - Comments (0) - Maintenance

Please be aware that on **April 28, 2025 between 08:00 - 14:00 UTC**, ESET Secure Authentication service will undergo a scheduled maintenance.

During the upcoming release, we anticipate that customers using 2FA authentication will remain unaffected. However, please note that logins to ESET Secure Authentication Web Console will be temporarily unavailable for **up to 90 minutes**. (Customers will not be able to activate 2FA for their accounts and to manage users & components).

Thank you for your patience and understanding.
