Large module update scheduled for October 18

2022-10-11 - Steef | ESET Nederland - Comments (0) - Customer Advisories

We would like to announce that on Tuesday, October 18, we plan to release Advanced heuristics module 1217.1 and its accompanying Advanced machine learning module 1126 that will come at around **15MB** in size combined.

We expect the modules to be available on the update servers in the early afternoon hours CEST.

The mentioned modules were already put to pre-release update servers in the recent weeks.
