Pre-release announcement: ESET PROTECT Cloud 4.0

2022-10-25 - Steef | ESET Nederland - Comments (0) - Releases

Release notes:

- The release process, as usual consists of several individual (internal) tasks/activities which will be executed from **3.11.2022** (starting 9:00 CET) - to **17.11.2022**
- Mind the fact, that due to thousands of ESET PROTECT Cloud instances, the upgrade will happen in phases (gradual roll-out to individual instances) from **3.11.2022** - **17.11.2022** to secure smooth operation of the whole cloud service.
- Individual customers will be impacted in a minimal way. From their point of view, updates will require minimal downtime. Individual customer's instance would be inaccessible up to 15 minutes. Upgrades will happen out of business hours.
- New customers will not be affected, as a newly generated instance would be on the latest version from the very first moment.
- The security of the network will not be affected.

Changelog:

- ADDED: Basic incident overview in the ESET Inspect dashboard
- ADDED: CEF format for Syslog
- ADDED: Reporting of absolute and relative free space for hard drives in HW inventory
- ADDED: Log out action in the Computer context menu (under Power)
- ADDED: Log out Client Task
- ADDED: Ability to filter Computers by FQDN
- ADDED: Ability to filter Computers by Serial Number
