

## Pre-release announcement: ESET Security Management Center 7.0.72.2

2019-02-19 - Perry | ESET Nederland - [Comments \(0\)](#) - [Servicing release](#)

We have reached the technical readiness for ne ESET Security Management Center 7.0 hotfix with release scheduled to 21st February 2019, Thursday.  
Changes concern MDM components for both Windows and Linux; and repacked All-in-one installer. All other components remain the same.

**Product:** ESET Security Management Center

**Version:** 7.0.72.2 (MDM Windows-7.0.411.0; MDM Linux-7.0.524.0)

**Release Stage:** Hotfix

**Release Date:** February 21, 2019

**Languages:** All ESMC Languages

**Distribution:** Web/Repository

### **Changelog:**

Fixed: It's not possible to recover the iOS device from the lost mode after issuing the Find command from ESMC.

Fixed: Not all files are being removed from the installation directory after uninstallation of MDM Connector.

Fixed: Problem with the old version of MDM being still reported as installed after an upgrade, despite being correctly upgraded to the latest version due to the duplicated registry entries.

Fixed: MDM Connector crashes upon loading HTTPS certificate.
