Release Announcement: Direct Endpoint Management plugin for ConnectWise Automate v1.7

2022-08-01 - Mitchell | ESET Nederland - Comments (0) - Releases

Let me inform you that we have successfully released a **new version of the Direct Endpoint Management plugin for ConnectWise Automate v1.7** on the **22nd of July 2022**.

This is a service version. This version will be automatically downloadable from ConnectWise Marketplace.

Changelog:

- **Added:** Gathering of Firewall logs. These are visible in the Threat Log
- **Added:** Filter to computers page for "Agent Online" status
- **Changed:** Browser used for the policy editor within the plugin now uses CEFSharp. This previously used a WebBrowser control based on IE.
- **Fixed:** Bug that prevented updating credentials for multiple licenses all at once
- **Fixed:** Plugin monitors now include a flag for the "Global" group setting
