Release Announcement: Direct Endpoint Management plugin for Kaseya VSA v1.1.0.0

2022-09-30 - Steef | ESET Nederland - Comments (0) - Releases

I would like to announce to you today that we are launching the Direct Endpoint Management Plugin for Kaseya VSA v1.1.0.0 which has been in development for some time. Over the past year we have been working together with the team and the MSPs involved in the program to make sure that the plugin was stable with good performance and that all the relevant feedback from our MSPs has been incorporated into the General Availability version which we launch today. For those who have joined the Early Access Program and have worked with us, we would like to thank them for their cooperation and feedback.

Changelog:

- **ADDED:** Support for creating installer with the ESET PROTECT Cloud Management Agent
- **ADDED:** Support for uninstallation of the ESET PROTECT / ESET PROTECT Cloud Management Agent together with an ESET security product
- **ADDED:** Various bug fixes and performance improvements
