Release announcement: Direct Endpoint Management plugin for SolarWinds RMM

2020-05-07 - Steef | ESET Nederland - Comments (0) - Releases

Dear all,

let me inform you that as of the **5th of May 2020**, we have officially released new integration in our Direct Endpoint Management (DEM) family. Even though we have already had integration for SolarWinds N-Central, we were missing important component - **DEM plugin for SolarWinds RMM.**

Previously, it has not been possible to integrate with this specific RMM vendor. Options, however, changed and thanks to good relationship we have been able to build this new - script-based integration.

The integration is available for download from updated **product page:** https://www.eset.com/int/business/partner/integration/download-solarwinds-ncentral-dem-plugin/

Help is already available on following link:
