ESET Cloud Office Security version 558 has been released

2025-04-25 - Steef | ESET Nederland - Comments (0) - Feature release

Release details:

- Release date: April 22 (CA, DE) / April 23 (US) / April 24 (EU)
- Product: ESET Cloud Office Security 558
- Type: Major Release
- Availability: Global (EU, DE, CA, US)

Changelog:

- **Configurable Columns in All Screens with Tables**
  You now have the option to customize which columns are displayed in all screens that contain tables, including logs. Even better, this setting is saved and also applied when exporting data to a .csv file.
- **Import and Export Policies**
  By popular demand, we have added the ability to import and export policies. Whether you need to back them up or migrate clients as a Managed Services Provider, this new feature simplifies the process.
- **Add Sender to Approved Senders List from the Sample Submission Dialog**
  When submitting False Negative emails (incorrectly marked as spam) from the Scan Logs screen, you now have the option to add senders directly to your Approved Senders List.
- **Bulk Email Clawback**
  You can now move multiple clean emails to quarantine at once, eliminating the need to do this manually one by one.
- **New Actions for Email Rules**
  We've introduced two new actions in Email Rules:
  - Move emails to the Junk/Spam folder
  - Notify specified recipients via email
- **Improved Malware Detection Exclusion Workflow**
  Adding malware detection exclusions is now easier! You can now add exclusions directly from the Detections page.
- **Syslog Improvements**
  New format "Elastic Common Schema" (ECS) v8.17 was added to syslog in addition to json, CEF and LEEF. Two new fields, "cc" and "Reply-To", have been added to Email Details. Additionally, "DKIM",

"DMARC", and "SPF" are now available as optional fields in Syslog.

Support Resources:

ESET provides support in the form of a fully localized application and Online Help (user guides), online Knowledgebase, and applicable to your region, chat, email, or phone support.
