Release Announcement: ESET Endpoint Antivirus for MacOS 7.0.7300.0

2022-03-21 - Mitchell | ESET Nederland - Comments (0) - Releases

Changelog version 7.0.7300.0

- New: Completely rewritten product
- Improved: Completely new distributed architecture, similar to micro-services
  - Native 64-bit architecture
  - Higher performance - offloading unused modules, more effective code, improved multithreading
  - Better Security - whenever possible, processes are running under non-privileged accounts. Crashing or hijacking one product process will not disable all protections.
  - More Stability - simpler components, auto-restart in case of a crash
- Improved: Real-time file system protection
  - Latest native 64bit scanning engine
  - Optimized for multi-core performance
  - Real-time scanning under local user
- Improved: On-demand scanning
  - Via GUI or command line
  - Via ESET management console
  - Local scan scheduler
- Improved: Web & email protection
  - Web Access Protection
  - Email client protection
  - Anti-Phishing protection
- Improved: Brand new native Graphical user interface, including
  - Dark mode support
  - Native desktop notifications
  - Ability to disable GUI for end-user
  - Configuration of protection statuses
  - Some features requires ESET management console
- Improved: Automatic scan when inserting removable media
- Improved: Support for performance and all detection exclusions (by Path, by Path & Detection, by Hash)
- Improved: Extended configuration of ESET LiveGrid
- Improved: CLI commands same as on Linux platform
- Improved: Multi-language installation - automatic localization according to system language with system native language change
- Changed: ESET Enterprise Inspector 1.7+ support
- Changed: Compatible with ESET Security Management Center v7.2 and above and ESET PROTECT Cloud
  - LiveInstaller support in ESET PROTECT Cloud
  - Unified configuration options in ESET PROTECT
- Changed: Activation via License key or via ESET management console
- Changed: Management console is required as product GUI doesn't include all capabilities, especially product settings
- Removed: Some features are not yet available in the new generation. For detailed comparison, please see https://help.eset.com/eea_mac/7/en-US/whats_new_6vs7.html
- Many other both user-facing and under-the-hood improvements

After the upgrade from ESET Endpoint Antivirus for macOS version 6 to version 7, ESET Endpoint Antivirus for macOS will revert to default settings. This includes policies in the ESET management console.
ESET Endpoint Antivirus for macOS version 7 contains many differences to version 6, and some of the features are missing. Before you decide to upgrade your ESET Endpoint Antivirus for macOS, we recommend reading the topic Comparison of version 6 & version 7.

Build can be downloaded from the repository in ESET PROTECT console.

The build will not be available from the web page until support for a non-managed environment will be added.
