Release announcement: ESET Endpoint Antivirus for Windows on ARM (Public BETA) v8.1.2020.1

2021-07-01 - Steef | ESET Nederland - Comments (0) - Releases

This is to inform you that we have successfully published the **public BETA** release of **ESET Endpoint Antivirus for Windows on ARM** and the installation binary is henceforth available online on our global website, and can be manually deployed in managed networks following this [guidance](#).

Why protect ARM64 with ESET

Security from a trusted vendor

For more than 30 years, ESET® has been developing industry-leading IT security software and services. Our experts employ the combined power of machine learning and handpicked algorithms for the best level of security.

The best level of protection for your device

Prevent attacks and detect malicious activity, including ransomware or advanced threats. ESET Endpoint Protection provides cross-platform security for your business, no matter the system or hardware.

Unified remote threat management

Via ESET's unified threat management (UTM) console, ESET PROTECT, you can easily deploy, activate and manage ARM64-based devices. Just like any other endpoint, smartphone, or server.

Get protected with ESET BETA FOR WINDOWS

We appreciate your feedback, so feel free to participate in the [ESET Security Forum](#) and let us know how you like the BETA. Note for home users: to enter the home BETA, please sign up in the forum first. In return, you'll be granted access to the latest home version installation package.
