Dear all,

this is to inform you that we have successfully published the hotfix of both **ESET Endpoint Antivirus** and **ESET Endpoint Security 8.1** and the installation binaries are henceforth available online on our global website and in the software repository of ESET PROTECT.

Change-log:

- FIXED: Incorrect application status of "AMSI integration failed" shown upon changing setting "Enable advanced scanning of browser scripts".
- FIXED: CVE-2022-27167
- IMPROVED: Upgrade and uninstallation problems caused by external registry entries corruption.
- FIXED: Some interactive alerts from Firewall not displayed.
- FIXED: Events not saved to Windows Event log.
- FIXED: Privacy policy link in About screen.
- FIXED: RTFS non-functional not reported to ESET PROTECT console in case Restart required status present.
- FIXED: Disable checking upon inbox content change setting of Mail client integration functionality.
- FIXED: ESET RMM (Remote Monitoring and Management) status reporting of disabled features.
- FIXED: Advanced setup freeze after change of Updater settings.

Known issues:

- HIPS component is reporting wrong status after enabling before restart.
- On Windows 10, build version 1903 and 1909, the integration with AMSI can stop working and PowerShell scripts execution cannot be monitored on-the-fly.
