Release announcement: ESET Endpoint Antivirus/Security 11.1.2039.2

2024-07-12 - Steef | ESET Nederland - Comments (0) - Feature release

Feature summary:

Support for Vulnerability & Patch management v1.2

Patch maintenance window, on-demand vulnerability and patch scan, local log.

Support state messaging and visualization in endpoint UI

Second stage of Endpoint UI modifications for displaying important support-stage, end-of-life status, operating system support, and related informative updates, with act-on choices or direct KB article links.

Layout changes of ESET LiveGuard settings

Additional layout changes of ESET LiveGuard configuration section to improve settings readability and privacy context.

Redesigned use-case characteristics of Override mode

Redesign of Override mode based on user feedback, simplifying access and enhancing usability.

RDP Access Restriction

Additional hardening against attacks from multiple IP-addresses or botnets in combination with weak password policy for the Brute-force attack protection in ESET Endpoint Antivirus, where firewall is not part of the solution.

Changelog:

- New: Support for On-demand Vulnerability scan for Vulnerability and Patch Management
- New: Vulnerability and Patch Management scheduler advanced options to enforce patching of missing patches automatically
- New: Vulnerability and Patch Management logging capability both locally and reporting to ESET Protect console

- Fixed: Security vulnerability CVE-2024-3779 [expected CVSS 6.1] - reported externally under responsible disclosure policy
- Fixed: Persistent AMSI registration
- Improved: Override mode not asking for Advanced setup password when enabling
- Improved: Possibility to set weather locally changed settings during Override mode are reverted after ending it
- Improved: Start/End of Override mode possibilities added to Setup page and tray icon context menu
- Improved: Device control distinguishes between camera and scanner by icon in Populate devices
