Release Announcement: ESET Endpoint Encryption Server 3.7.0.0

2023-12-21 - Steef | ESET Nederland - Comments (0) - Releases

I want to inform you that the feature update of the ESET Endpoint Encryption Server v3.7.0.0 was released on the 19th of December 2023.

Changelog:

- New: All-in-one installer will now install PHP 8.2.11
- New: Report for FDE logins on workstations
- Improved: Reports now improved run in background
- Improved: Rebranded install and login page
- Changed: Product versioning aligned with ESET versioning rules
- Fixed: Resolves some install problems all-in-one and missing SQL password
- Fixed: Issue uploading SSL certificates

Installation Packages:

EEES v3.7.0.0 is now available on our official [download page](#).
