Release announcement: ESET File Security 7.2.12004 for Microsoft Windows Server

2020-09-24 - Steef | ESET Nederland - Comments (0) - Releases

This is to inform you that we have successfully published the service release of **ESET File Security 7.2 for Microsoft Windows Server** and the installation binaries are henceforth available online on our global website and in the software repository of ESET Security Management Center.

Change-log:

- Added: Local machine learning module for aggressive detection.
- Added: Unified exclusions.
- Added: Network isolation override.
- Added: Azure File Sync compatibility.
- Fixed: Potential conflicts with backup software at file-level when real-time file-system protection is enabled.
- Fixed: System event log entries indicating there is a problem with Microsoft Windows Failover Clustering Client, as a result of discovery activities in automatic exclusion routines.
- Fixed: Black screen on Windows Server build 14393.
- Fixed: Isolated problem with network connections that utilize Internet Protocol Security (IPsec) encapsulation.

Known issues:

- None relevant.

Build version: **7.2.12004.2, 7.2.12004.3**
Languages: all (ENU CHS, CHT, CSY, DEU, ESL, ESN, FRA, FRC, IND, ITA, JPN, KOR, NLD, PLK, PTB, RUS, SKY, TRK)
Project stage: Service Release
