Release Announcement: ESET inspect 1.10.2664.0

2023-03-28 - Mitchell | ESET Nederland - Comments (0) - Releases

Version 1.10.2664.0

- Added: Multitenancy support completed (management of access rights per group, synchronization of static group types, and improved blocking of modules)
- New: New signals to indicate ransomware attacks
- New: Simple incident creation based on the Dutch partner's (specific endpoint rules) SIEM rules
- New: Detection of files delivered through RDP connection's copy & paste
- New: Displayed OS API calls from LiveGuard
- New: MDR Report Template
- New: Dark Mode
- New: ESET LiveGuard information columns in the executables table view
- Fixed: Stability and performance fixes

Installation packages are available in the ESET PROTECT Repository and [the download section of our website](#)
