Release Announcement: ESET INSPECT 1.12.3296

2023-10-31 - Steef | ESET Nederland - Comments (0) - Releases

Changelog version 1.12.3296:

- New: Grouping of detections that are similar and occur at similar time
- New: A clear chart depicting the creator of the incident is added
- Changed: Rule module - Whenever we detect a new threat and create a rule to defend against it, the rule is automatically added to the module
- Changed: Learning mode is turned on by default and Exclusions are automatically enabled
- Improved: Questions view section - Users can accept or reject suggestions using multi-selection
- Improved: Incident graph - Users see the exact layout they've set up every time they access it
- Improved: Performance, reducing memory usage
- Improved: LiveGuard Status, showing a clear progression from "Queued" to "Sent"

Installation packages are available in the ESET PROTECT Repository and download section of our website.
