Release Announcement: ESET Inspect & ESET Inspect Cloud v1.8.2211.0

2022-10-14 - Steef | ESET Nederland - Comments (0) - Releases

I am happy to announce the release of ESET Inspect and ESET Inspect Cloud version 1.8. The on-prem version is available to download (links below + available via ESET PROTECT repository) since yesterday, the 13th of October, and cloud instances are being updated with an estimated completion today by end of business.

This version introduces a major change in EI's architecture (moving the evaluation of Detection Rules from the EI Server to the EI Connector) and various other smaller changes.

Changelog:

- **Major functionality**
  - Moving of Detection Rules evaluation from the central EI Server to individual endpoints
  - ESET MSP Administrator integration
- **Database improvements**
  - Partitioning of Processes table
  - Display Purge status overview
- **Detection capability improvements**
  - Ability to monitor SYS Files
  - Ability to monitor Kernel module load/unload operations on Linux
- **Response capability improvements**
  - Computer Reboot and Shutdown exposed to Rule engine as response actions
- **UI improvements**
  - Alignment of context menus and toolbars to match ESET PROTECT
  - Ability to go from Process's raw events to Computer's raw events
- **Cloud specific improvements**
  - ISO certification achieved for ESET Inspect Cloud
  - SLAM integration (internal only)
  - Flexible Servers (internal only)
  - Central redirectors in US and Japan (internal only)
  - Instance UUID displayed in the About section

Documentation: What's new in ESET INSPECT v1.8

Known Issues

- Installation of the on-prem EI Server can take quite a long time in large environments

Planned release date

- 13. October 2022 for on-prem
- Throughout 13. and 14. October for cloud instances

Installation packages

- On-prem EI Server and EI Connectors download here and/or deploy via ESET PROTECT
- For ESET Inspect Cloud first check whether your instance has been updated to v1.8 and if yes, proceed with update of EI Connectors via ESET PROTECT Cloud

Installation notes

- Update EI Server to 1.8 first and EI Connectors afterwards
- EI Server v1.8 is compatible with v1.7 EI Connectors but not the other way around

Language

- English
