Release announcement: ESET Mail Securety for Exchange 7.0 (Hotfix)

2019-02-27 - Perry | ESET Nederland - Comments (0) - Servicing release

we have successfully published the hotfix release of ESET Mail Security 7 for Microsoft Exchange Server (EMSX) and the installation binaries are henceforth available online on our global website.

EMSX

Changelog:

- Added: Rules: New conditions related to SPF
- Added: Rules: Added import/export option in string lists
- Improved: Improved target selection in on-demand scan
- Changed: Search in Mail quarantine is case-insensitive
- Improved: Anti-Phishing optimization
- Fixed: Rule "Attachment size" doesn`t work in Mail transport protection (TNEF)
- Fixed: Received IP usage
- Fixed: Mail server protection log details do not show complete text
- Fixed: GUI crash due to the incorrectly updated record indices
- Fixed: Unable to release email from email quarantine-report

Known issues:

- Upgrade from version 4.5 doesn't transfer activation and settings
