Release announcement: ESET Mail Security 7 for Windows

2018-11-28 - Perry | ESET Nederland - Comments (0) - Servicing release

De hotfix release van ESET Mail Security 7 for Microsoft Exchange Server (EMSX) is beschikbaar.

Deze kan deployed worden via ESMC (ESET Security Management Center) of gedownload worden:
https://www.eset.com/nl/zakelijk/server-antivirus/mail-security-exchange/download/

EMSX

Changelog:

- Improved: Virtual users list process performance
- Fixed: Missing or incorrect reasons shown in greylist logs
- Fixed: Anti-phishing protection, locked via ESMC, can be paused or disabled in the EMSX “Advanced setup” screen
- Fixed: ESMC runs multiple thread generations simultaneously

Known issues:

- Upgrade from version 4.5 doesn't transfer activation and settings

Build version: **7.0.10022.0**
