2022-05-30 - Steef | ESET Nederland - Comments (0) - Releases

I want to inform you that the new version of **ESET Mail Security for Domino Server 9.0 was released today May 30, 2022**. Additional release for automatic updates is planned within the safety period (~30 days) and will be announced appropriately with release announcements.

Release details:

- **Release date:** May 30, 2022
- **Product:** ESET Mail Security for Domino Server - 9.0.14005.0
- **Type:** Major release
- **Availability:** Global

Changelog

- **IMPROVED**
 - Database scan remaining time indicates real-time as it is for computer scan
 - A time limit option was added to scheduled On-demand scans to have the possibility to stop the scan after a defined period of time automatically
 - Possibility to automatically load internet domains from the Global Domain document
 - SPF: possibility to verify MAIL FROM domain first before HELO domain
 - When the database scan is running, the tray icon has the status "Database scan is running"
- **ADDED**
 - Issue switcher to the ekrrn plugin to display statuses was added
 - Application status for paused AntiPhishing protection was added
 - An automated screenshot of the EMSL product was added
- **FIXED**
 - "Mail server antispam protection disabled" was replaced by the new wording "Mail server antispam protection paused" is now fully functional
 - The server scan task started successfully with the Domino database containing a larger amount of mailboxes
 - AV alarm in ESET INSPECT console (agent log error) works now properly

- "Rules applied" count updated in real-time while running Database Scan
- Database scan is now possible to be stopped by the user
- GUI freezing issues fixed when user clicks on Database scan
- GUI issue with checkbox 'Scan excluded databases' is now marked according to the user preferences
- Advanced setup is now fixed when the uPCU update type is changed
- Status messages about cleaning settings are now shown properly
- Quarantine - threat name in attachment envelope is now shown correctly
