Release announcement: ESET Mail Security for Microsoft Exchange v8.0.10011.0

2021-06-23 - Steef | ESET Nederland - Comments (0) - Releases

Let me inform you that today we have released the new version of **ESET Mail Security for Microsoft Exchange version 8.0** and the installation binaries are available online on our global website and in the repository of ESET Protect.

Change-log:

- NEW: Log: better visibility for NOT_SCANNED emails in Mailserver protection log/details.
- NEW: MicroPCU technology with central EULA updates handling.
- NEW: Sender spoofing: add Message From: to Mail server protection log.
- NEW: Sender spoofing: add separate 'SPF results' condition for the message 'From'.
- NEW: Sender spoofing: add rule condition for comparing SMTP sender with "From" sender.
- NEW: Sender spoofing: add the option to reject messages coming from outside with the recipient's own domain
- NEW: Rules: Add%ReplyToAddress% placeholder to string condition
- NEW: Log: Anti-phishing detection should have higher priority over antispam detection
- NEW: Audit Logs: editing rules transport layer, rules before and after restore, creating rules transport layer, creating rules for database protection.
- IMPROVED: Fixed slow restart and shut down of the product during the upgrade or the repair.

Build version: 8.0.10011.0

Type of Release: Major Release
