Release Announcement: ESET Management Agent for Linux (version 7.1.367)

2019-07-17 - Mitchell | ESET Nederland - Comments (0) - Releases

ESET Security Management Center version 7.0.72.5 has been released. **This version contains only the new ESET Management Agent for Linux (version 7.1.367). Other components are not part of the release.**

The new Linux Agent is adding the support for ESET File Security for Linux version 7. You need to update your Agent only on Linux machines where you are going to install the ESET File Security for Linux version 7. The update is available for all Linux machines and Virtual Appliances via repository. You can also download the new Linux Agent installer from the ESET download site. The new Linux Agent is not compatible with ESET Remote Administrator version 6.x.
