Release Announcement: ESET PROTECT 10.1.24.1

2023-06-27 - Steef | ESET Nederland - Comments (0) - Releases

We would like to confirm the successful release of ESET PROTECT 10.1.

For more information about this release, see the changelog below and the What's New document for resellers.

Changelog:

- ADDED: Detections grouped by common attributes

- ADDED: An MDR Report Template for offices and partners delivering ESET Services

- ADDED: Data filter per customer for MSP administrators in the Dashboard section

- ADDED: New section for MSP administrators, "Managed Customers," offering an overview of all managed customers

- ADDED: MSP administrators can filter report templates per customer when creating scheduled reports

- ADDED: Ability to add columns FQDN and Serial Number in the Computers section

- ADDED: Syslog includes a computer's operating system, and a static group's full hierarchy and description

- ADDED: New branding visuals within the console

- ADDED: Ability to combine Computer name, Database version and Last connection in one report

- IMPROVED: Sending documents to ESET LiveGuard is now ON by default for new customers

- IMPROVED: Easier search within the console with no need to first choose a category

- IMPROVED: Filter policies by name

- IMPROVED: Information about installer creation and downloads added to the Audit Log

- IMPROVED: MSP customers ready for a set up distinguished by an icon

- IMPROVED: New version of the AV Remover and Log Collector in the Management Agent

- IMPROVED: Size values in Submitted Files

- IMPROVED: Promoting ESET Bridge as a replacement for the discontinued support of Apache HTTP proxy

- CHANGED: The "Auto-updates" policy will become a part of the "Common features" policy when the new Configuration module is released (planned for July)

- FIXED: Inability to resolve/unresolve detections when the parent group is selected in the tree

- FIXED: Wrong ESET LiveGuard license was shown while editing the existing software install task

- FIXED: Incorrect filter behavior when multiple license statuses are selected

- FIXED: Issues with displaying the Product Tour in the Safari browser

- FIXED: Creating a dynamic group template based on a value "LiveGuard is not working due to a license problem" not functioning properly

- FIXED: Dynamic group template based on a value "macOS is preventing the ESET security product from accessing some folders" not working properly

- Other minor improvements and bug fixes
