Release announcement: ESET PROTECT 9.1 (Hotfix)

2022-07-28 - Riccardo Aanen - **Comments (0)** - **Servicing release**

We have fixed one problem related to the agent and one problem related to the all-in-one installer (.zip and .iso).

You can upgrade agents manually via the console, or they will be upgraded automatically in several days. (Note: Automatic upgrade will happen for agents managed by the recent version of ESET PROTECT and ESET PROTECT Cloud as well)

Changelog

- FIXED: ESET Management Agent not using SNI extension when communicating with ESET PROTECT

- FIXED: Upgrade of ESET PROTECT using All-in-one package fails in case there is a more recent version of the SQL Server 2019 or when a SQL Server 2014 is installed.

Product: ESET PROTECT

Hotfix version (Build Information): 9.1.18.1

New versions of Agents:

- 9.1.1298.0 (Windows)
- 9.1.2304.0 (Linux)
- 9.1.3295.0 (macOS)

Installers: https://www.eset.com/nl/zakelijk/download/eset-protect/
