## Release announcement: ESET PROTECT Cloud 3.0

2021-10-19 - Steef | ESET Nederland - Comments (0) - Releases

Update 28-10-2021 : We would like to confirm the successful release of ESET PROTECT Cloud 3.0 into the production environment.

**All eligible cloud instances are on the latest version.**

Let me inform you, we are planning to deploy a new version of ESET PROTECT Cloud 3.0 into production during **21.10.2021 - 5.11.2021**.

### Release notes:

- The release process, as usual consists of several individual (internal) tasks/activities which will be executed during 21.10.2021 (starting 9:00 CET) - 5.11.2021
- Mind the fact, that due to thousands of ESET PROTECT Cloud instances, the upgrade will happen in phases (gradual roll-out to individual instances) from 21.10.2021 - 5.11.2021 to secure smooth operation of the whole cloud service.
- Individual customers will be impacted in a minimal way. From their point of view, updates will require minimal downtime. Individual customer's instance would be inaccessible up to 15 minutes. Upgrades will happen out of business hours.
- New customers will not be affected, as a newly generated instance would be on the latest version from the very first moment.
- The security of the network will be not affected.

### Changelog:

- ADDED: Support for Automatic Product Updates (available from Windows Endpoint version 9.0)
- ADDED: Management for brute-force attack protection (available from Windows Endpoint version 9.0)
- ADDED: Easy trial, deploy and purchase of ESET Dynamic Threat Defense (EDTD)
- ADDED: Web control for Android devices
- ADDED: System updates management for Android
- ADDED: New column Logged users in Computers table
- ADDED: Windows OS build number is reported as a separate symbol (possibility to use it in Dynamic groups)
- ADDED: List of submitted files (EDTD) in Computer details, Detection and Quarantine section
- ADDED: New product categories in Product version status section on Status Overview

- ADDED: Full path to a computer in received notifications
- ADDED: Possibility to disable the triggering of notifications for muted computers
- ADDED: Possibility to manage session protection (e.g., disable blocking requests from different IP addresses)
- CHANGED: Reducing and re-organizing columns in the Computers section
- IMPROVED: ESET Dynamic Threat Defense perception (added information of what was originally detected by EDTD)
- IMPROVED: Operating system update - allowing the user to postpone the required reboot
- IMPROVED: Operating system update task accessible not only from context menu over a group but also over a single device
- IMPROVED: Now is possible to visually distinguish locked policies in policies and computer details screens (padlock icon)
- IMPROVED: When users create new permission sets, some checkboxes can grey out based on their permission (users can not give higher permission that they have)
- IMPROVED: Automatically selected newly created permission set when creating a new user
- IMPROVED: Basic support of installer file caching in script-based Agent Live Installers
- IMPROVED: Date and Time displayed in format according to language
- IMPROVED: Faster displaying of the planned flag on client tasks also after assigning to the significant amount of targets
- IMPROVED: The enrollment URL link is visible below the QR code, and the user can copy it in the enrollment wizard
- IMPROVED: New version of LogCollector in Management Agent
- FIXED: Idle session timeout was not matching settings in ESET Business Account
- FIXED: Triggers - infinite loading in some cases when the user changes trigger type
- FIXED: Unwanted machines moved during computers import
- FIXED: Missing notification about scheduled restart (macOS - osascript)
- FIXED: License is randomly changed when the software install task is edited
- FIXED: Notifications - Message preview is not displaying properly
- FIXED: macOS Big Sur, specific protections statuses are missing in dynamic groups and report templates
- FIXED: Users without access to an EDTD license cannot see the data on the EDTD Dashboard
- FIXED: Multiple sorting does not sort correctly
- FIXED: Performance issue when deleting a large number of exclusions
- FIXED: EDTD Deployment on Dynamic Group ends with error
- FIXED: Various other bug fixes, security, and performance improvements
