Release announcement: ESET Security for Microsoft SharePoint Server 9.0.15004.0 (hotfix)

2023-01-30 - Steef | ESET Nederland - Comments (0) - Servicing release

This new version contains fixes and improvements for issues related to Windows updates and eShell SharePoint scan.
The release to web/repository is planned for 30 January and will be followed by first phase of Auto-update/uPCU release (50%) on 13 February, while the last phase (100%) is scheduled for 27 February. In order to speed up the process and receive update right after the web/repository release administrators can use "Check for updates" button available in the application GUI.

Release details:

- Release date: 30 January 2023
- Product: ESET Security for Microsoft SharePoint Server - 9.0.15004.0
- Type: Hotfix
- Availability: Global excl. Japan

Changelog:

- eShell SharePoint scan starts in read-only mode by default
- IMPROVED: Protected antimalware service will not time out any longer during boot when Windows updates keep the file-system busy
