Release Announcement: ESET Security Management Center 7.1

2019-11-13 - Steef | ESET Nederland - Comments (0) - Releases

We would like to confirm the successful release of ESET Security Management Center 7.1.

We are bringing several new features and improvements. The most interesting features summarized in one sentence, that we have added in ESMC 7.1 are **ESET Full Disk Encryption** (necessary additional license), **New Tagging options**, **MSP Automation Framework**, **New Unified Exclusions** which is possible to create from the intuitive wizard and of course many more **usability improvements**.

I want to say many thanks to all partners and customers for valuable feedback, which helping us to create excellent products. Last but not least, big thanks to all teams and people who are continuously participating in improving ESET products.

Product: ESET Security Management Center

Service version (Build Information): Version: 7.1.27.0
