Release announcement: ESET Server Security 8.0.12003.0 for Microsoft Windows Server

2021-06-17 - Steef | ESET Nederland - Comments (0) - Releases

This is to inform you that we have successfully published the release of **ESET Server Security 8.0 for Microsoft Windows Server** and the installation binaries are henceforth available online on our global website and in the software repository of ESET PROTECT.

Change-log:

- NEW: Product renaming from ESET File Security for Microsoft Windows Server to ESET Server Security for Microsoft Windows Server.
- NEW: MicroPCU technology with central EULA updates handling.
- NEW: Automatic product updates at hotfix level to distribute security and stability patches without administrator interaction.
- NEW: Extending capabilities of on-demand scan to inspect OS repositories like WMI or system registry in full depth.
- NEW: Local Audit-log.
- FIXED: OneDrive scan dialog cannot be displayed.
- FIXED: Impossible to start more than 10 scan simultaneously.
- FIXED: Scan your computer scan only C: and not other disks.
- FIXED: Windows Defender is not turned on after uninstallation of EFSW in case of upgrade.
- FIXED: OneDrive scan cannot be canceled by user.
