Release Announcement: ESET Server Security for Microsoft Windows Server 10.0.12012.0 (hotfix)

2023-06-28 - Steef | ESET Nederland - Comments (0) - Servicing update

Release details:

- Release date: 28th of June 2023
- Product: ESET Server Security for Microsoft Windows Server - 10.0.12012.0
- Type: Hotfix release
- Availability: Global excl. Japan

Changelog

- IMPROVED: Introduced new Hyper-V on-demand scan result state of "completed with warnings" to indicate the presence of issues in the scan log.
- IMPROVED: eShell cluster initialize command now accepts file containing list of nodes separated by newlines.
- CHANGED: eShell scheduler command renamed from „action“ to „type“.
- FIXED: A problem where a non-admin user was unable to restart the server via GUI.
- FIXED: A problem where it was not possible to activate ESET Inspect Connector with offline license.
- FIXED: Addressed the customer-reported issues of slow application openings and timeouts for specific applications.
- FIXED: The issue causing log on and log off sessions to get stuck, requiring a server reboot for resolution.
