Yellow End of Life alerts on Endpoint v5

2021-01-13 - Steef | ESET Nederland - Comments (0) - Customer Advisories

UPDATE January 13, 13:50 CET:

The Antivirus and antispyware scanner module 1569 is now available for pre-release users, this module enables the yellow alerts in v5 Endpoint products.

Following the **yellow "product outdated" alerts** on more recent (v6+) products, we will show the same alert on **v5 Endpoints** as well, starting with **pre-release users on January 13** and **general public on January 20**. Please, guide the customers who contact you to upgrade according to the scenarios laid out at https://support-eol.eset.com/

Later this month, we also plan to switch the current v6+ Endpoints from yellow to red alerts. We will share more information once an exact date is set.
