Add Privileged users to macOS/Linux Desktop clients using ESET Security Management Center

Anish | ESET Nederland - 2019-02-04 - Comments (0) - ESET Security Management Center

Issue

- Allow or prevent certain users from accessing important settings in ESET Endpoint Antivirus/Security for macOS and ESET NOD32 Antivirus Business Edition for Linux Desktop

What is a Privileged user?

The **Privileged users** list is similar to password protection; removing a user from this list will deny them access to configuration settings in ESET Endpoint Antivirus/Security for macOS and ESET NOD32 Antivirus 4 Business Edition for Linux clients.

Details

Solution

You can set Privileged users during installation, add them later in the program settings, or define them from the ESET Security Management Center (ESMC) Web Console. To add Privileged users using ESMC, follow the steps below:

1. [Open the ESET Security Management Center Web Console](#) (ESMC Web Console) in your web browser and log in.
2. Click **Policies** → **New Policy**.
