Go beyond security management with ESMC

Steeff | ESET Nederland - 2019-12-31 - Comments (0) - ESET Security Management Center

ESET Security Management Center is your command center for all ESET security solutions deployed in the network. It controls endpoint prevention including detection & response layers across all platforms — desktops, servers, agentless virtual machines, and managed mobile devices. Using agent-based architecture, ESET Security Management Center can do more than just remotely manage ESET security products.

This video demonstrates how to:

- Configure tasks to update the operating system
- Remotely enable RDP
- Run scripts
- Run remote commands
- Apply operating system updates
- Install and uninstall applications
- Collect Logs
- See the list of software installed on machines
- See detailed hardware configuration information
