Release Announcement: Direct Endpoint Management plugin for ConnectWise Automate v1.5

2021-01-04 - Steef | ESET Nederland - Comments (0) - Releases

Dear All,

Allow me to inform you about a new major version of the Direct Endpoint Management plugin for **ConnectWise Automate v1.5**.

The new version is now live and available in the ConnectWise Automate console. For more information please see [ConnectWise marketplace](#).

We're pleased to announce that the latest version introduces several usability improvements as well as new interaction additions as described in **the changelog below**.

Changelog:

- **Added:** Option to choose the exact product for deployment in Advanced Settings of Package Creation
- **Added:** Uninstall ESET option in Product field when editing a package, without the need to create deployment packages
- **Added:** New 'Blocked files' and 'Filtered Websites' values in Threat logs
- **Added:** 'Resend Policy' option within the ESET Tasks drop-down menu
- **Added:** Context Menu for computers in Threat logs and Scan logs grids containing options 'Show Computer Detail'; 'Computer Properties'; 'Refresh System Info'; 'On-Demand Scan'
- **Added:** Filter option (both include * by default and exclude !) for 'Threat Source' in Threat log table
- **Added:** Data exclusion filter option taking string starting with ! as an input (e.g. !Computername)
- **Added:** Display of warning about restricted characters in EMA2 Security Admin passwords
- **Added:** Caching ESET downloads to local server
- **Added:** Clearing alerts in ESET Tasks drop-down menu in Computers table to avoid unnecessary ticket creation for offline agents
- **Changed:** Frozen first column in relevant tables improving scrolling interaction and visibility when selecting fields
- **Changed:** OS exclusion checkboxes logic for deploying of relevant products only
- **Fixed:** Scan logs out of sync
- **Fixed:** EFSW product activation

- **Fixed:** v8 product configuration
- **Fixed:** Other minor issues
