Issue

Upgrade to the latest version of ESET Security for Microsoft SharePoint Server (ESHP)

Upgrade ESHP version 4.5 to the latest version 6.x release

Known issue: Cannot perform this upgrade from ESET Remote Administrator

Remote product upgrade from version 4.5 using the ESET Remote Administrator software installation task will be aborted and return a general installation error.

Solution

Alternative installation methods

You can also perform this upgrade remotely, or by using ESET Cluster wizard. [Click here for more information.](#)

1. Click the appropriate link below to download the ESHP installer file. Save the installer (.msi) file to your Desktop:
