## Which ESET File/Mail/Gateway Security agents can I use with my license?

Ondersteuning | ESET Nederland - 2017-10-31 - Reacties (0) - Legacy

### Issue

---

Using ESET File, Mail, or Gateway products, you receive the following errors written to the log file:

```
Child process smfi[7307] terminated with return code 69, restart in 60 seconds
Child process smtp[7148] terminated with return code 70, won't be restarted'
```

### Details

### Solution

---

Verify that a valid license file (\*.lic) exists for your ESET product in the `/etc/esets/license` directory.

A valid license for **ESET File Security** will allow you to use these ESET agents:

```
esets_dac
libesets_pac.so
esets_scan
```

A valid license for **ESET Mail Security** will allow you to use these ESET agents:

```
esets_cgp
esets_cli
esets_imap
esets_mda
esets_pipe
```

esets\_pop3  
esets\_smfi  
esets\_smtp

A valid license for **ESET Gateway Security** will allow you to use these ESET agents:

esets\_ftp  
esets\_http  
esets\_ssfi.so  
esets\_icap
