

# What is CONNECT

**ESET Connect is a cybersecurity API gateway, a powerful tool for network administrators and SECOPS engineers that allows for increased automation, improved visibility, integration with existing tools, customization, and centralized management of cybersecurity tasks.**

A single point of contact for customers – external API consumers, ESET Connect enforces security policies to protect against threats and efficiently routes traffic between ESET, the API producer, and consumers.

In the Early Access Program, ESET makes available the APIs for ESET PROTECT Cloud – giving you the power of the ESET PROTECT Platform – the world's most formidable cybersecurity based on superior research, at your fingertips.

## APIs available in Early Access

- |  |   |
|--|---|
| <ul style="list-style-type: none"> <li>✓ Get a list of devices</li> <hr/> <li>✓ Get a list of devices based on specific filters</li> <hr/> <li>✓ Get all devices for the specified tenant</li> <hr/> <li>✓ Get devices based on ID</li> <hr/> <li>✓ Get computer details for specific objects</li> <hr/> <li>✓ Get groups</li> <hr/> </ul> | <ul style="list-style-type: none"> <li>✓ Get a list of events (detections) for a specific device/<br/>Get a list of detections based on specific filters</li> <hr/> <li>✓ Isolate computer from network/ end computer<br/>isolation from network</li> <hr/> <li>✓ Run On-Demand Scan</li> <hr/> <li>✓ Shutdown/ restart computer</li> <hr/> </ul> |
|--|---|

## Benefits

- |  |   |
|--|---|
| <ul style="list-style-type: none"> <li>✓ <b>Centralized management:</b> Manage security-related tasks from your preferred, centralized location, such as a security operations center (SOC), and reduce duplication and confusion.</li> <hr/> <li>✓ <b>Integration:</b> Integrates with existing systems and applications such as ticketing systems, log management tools, and SIEM &amp; SOAR solutions.</li> <hr/> </ul> | <ul style="list-style-type: none"> <li>✓ <b>Improved efficiency:</b> Streamline digital security workflows and enhance the efficiency of security operations.</li> <hr/> <li>✓ <b>Reduced risk of human error:</b> Automate security-related tasks and reduce the risk of human error.</li> <hr/> <li>✓ <b>Automation of responses:</b> Automate security-related tasks across multiple solutions and platforms.</li> <hr/> </ul> |

**Progress. Protected.**

# ESET Connect Features

## ENHANCED SECURITY

ESET Connect provides an authentication layer so only authenticated users can access a backend API and are authorized to use its functions, data and operations.

## SIMPLIFIED SERVICE DELIVERY

ESET Connect enables the combination of API calls to request services, reducing the traffic volume and streamlining API processes to improve the user experience.

## PLATFORM AGNOSTIC HTTP DELIVERY

Using HTTPS as a delivery mechanism, you can integrate the APIs into your application, regardless of the platform or language used.

## TAP INTO THE POWER OF THE ESET PROTECT PLATFORM

Using ESET Connect, you can unlock the power of the world's most formidable cybersecurity, based on superior research.

## API MONITORING AND LOGGING

ESET Connect provides monitoring for all APIs and tracks requests and response times. It provides unified logging for all APIs so that end-to-end debugging can be performed in urgent cases.
