A new version has been released

Version 6 of ESET Remote Administrator (ERA) and ESET business products were released in North America December 11th, 2014, and globally February 25th, 2015. This article applies to version 5.x and earlier ESET business products. For information about what's new in the latest version and how to upgrade, see the following article:

What's new in ESET version 6 business products?

ESET recommends that you only enable pre-release updates in situations when a pre-release update will resolve an issue you are having with your ESET product. Once you have received the update that resolves your issue, we recommend that you revert back to regular updates.

If you do not use ESET Remote Administrator to manage your network

Perform these steps on individual client workstations.

Enable pre-release updates using ESET Remote Administrator

1. Open the ESET Configuration Editor by clicking **Start → All Programs → ESET → ESET Remote Administrator Console → ESET Configuration Editor**.

1. Expand **Windows product line v3 and v4** → **Update module** → **Profile** → **Settings** and then click **Pre-release updates**.

1. Select the check box next to **Value**.
