Activate ESET business products using ESET PROTECT (8.x)

Steef | ESET Nederland - 2021-01-14 - Reacties (0) - Legacy

Issue

- Activate ESET products installed on your endpoints or server using a task in ESET PROTECT
- This task can be used to activate all common ESET PROTECT components including ESET Shared Local Cache and ESET Mobile Device Manager

Solution

Prerequisites:

- Make sure the <u>necessary ports are open</u> on your network
- Deploy the ESET Management Agent
- Deploy or upgrade ESET endpoint products using ESET PROTECT
- Add valid ESET-issued License Keys to License Management in the ESMC Web
 Console

Activate ESET products using the ESET PROTECT Web Console:

ESET PROTECT 8.x User Permissions

This article assumes that your ESET PROTECT user has the correct access rights and permissions to perform the tasks below.

If you are still using the default Administrator user, or you are unable to perform the tasks below (the option is grayed out), see the following article to create a second administrator user with all the access rights (you only need to do this once):

Create a second administrator user in ESET PROTECT

A user must have the following permissions for each affected object:

Functionality	Read	Use	Write
Groups & Computers	\checkmark	~	\checkmark

A user must have the following permissions for their home group:

Functionality	Read	Use	Write
Product Activation (under Client Tasks)	\checkmark	~	\checkmark

When these permissions are in place, follow the steps below.

- 1. Open ESET PROTECT Web Console in your web browser and log in.
- 2. Click Tasks → All Tasks→ ESET Security Product→ Product Activation and click

New →	Client	Task.
