Add or remove password protection of ESET security product settings from ESET PROTECT (8.x)

Steef | ESET Nederland - 2021-04-23 - Reacties (0) - Legacy

lssue

- ESET security product settings are not password-protected on client workstations
- ESET security product settings are password-protected on client workstations

Solution

Add password protection

- 1. <u>Open the ESET PROTECT Web Console</u> in your web browser and log in.
- 2. Click Policies and select the desired Built-in policy.
- 3. Select the policy that you want to modify.
- 4. Click **Actions** → **Edit.**
