Automating tasks in ESET PROTECT for MSP

Steef | ESET Nederland - 2021-11-19 - Reacties (0) - Managed Service Providers

As an MSP, proactively managing the security of your customers is complicated and time-consuming. The powerful tools available to you in the ESET MSP program help you optimize and automate your daily operations efficiently. Save time by automating tasks to more easily meet your SLAs with clients and keep them secure.

This video demonstrates how to automate tasks in ESET PROTECT. Tasks you can automate include:

1. Installing software
2. Uninstalling software
3. Activating ESET products
4. Updating ESET product modules
5. Operating system updates
6. On-demand scanning
7. Displaying messages
8. Running commands
9. Computer shutdowns
