Configure automatic threat notifications in ESET Security Management Center Web Console (7.x)

Anish | ESET Nederland - 2018-09-14 - Reacties (0) - ESET Security Management Center

Issue

- Configure ESET Security Management Center (ESMC) to automatically generate a threat report notifying you when a new threat is detected on a client.

Solution

1. [Open ESET Security Management Center Web Console](#) (ESMC Web Console) in your web browser and log in.
2. Click **Notifications** → **New Notification**.

Advanced Settings—Throttling

Using default settings, a notification will be triggered any time that a threat is detected. You can use the **Criteria** feature under **Advanced Settings—Throttling** to configure notifications so that they are sent out based on specific criteria: **Time-based Criteria**, **Statistical Criteria**, or **Event log Criteria**. Read more detailed information about throttling in [ESMC Online Help](#).

1. Click **Distribution**. By default, notifications are sent by email. Type the subject line you want to use for notifications into the **Subject** field and then type the email address where you want notifications sent into the **Email Address** field.
Click **Finish**.
