Create a policy for automatic reboot request (auto-resolution) displayed on managed computers in ESET PROTECT Web Console

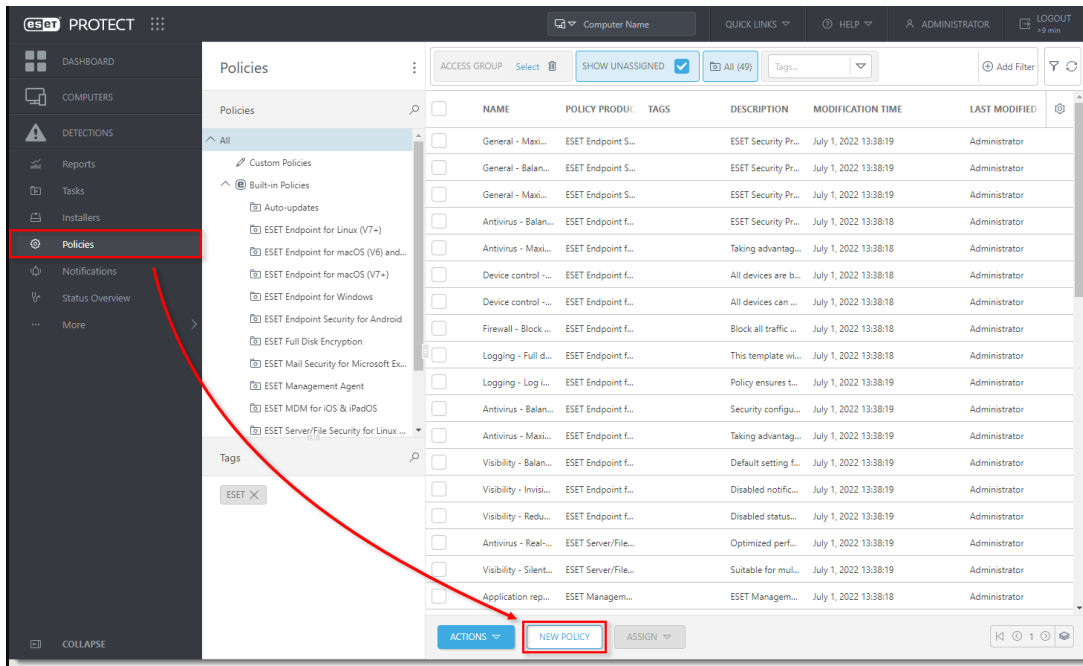

Lesley | ESET Nederland - 2022-08-29 - Reacties (0) - Endpoint Solutions

issue

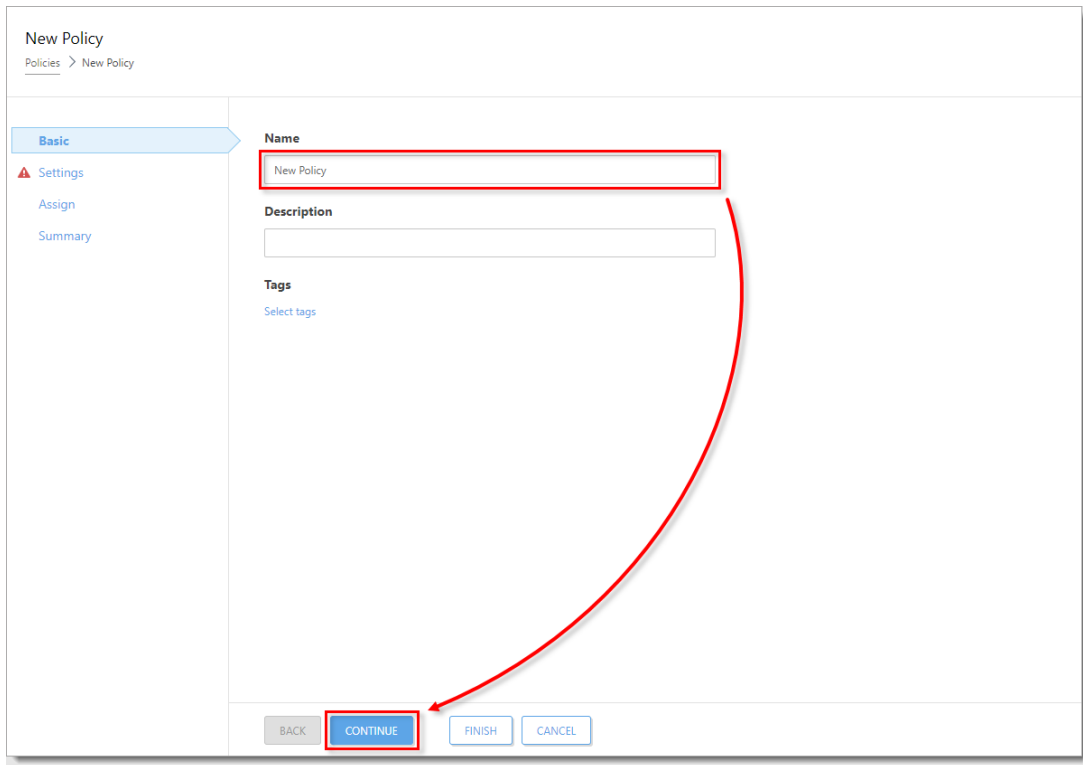

- Create a policy for automatic reboot request displayed on managed computers in ESET PROTECT Web Console

Solution

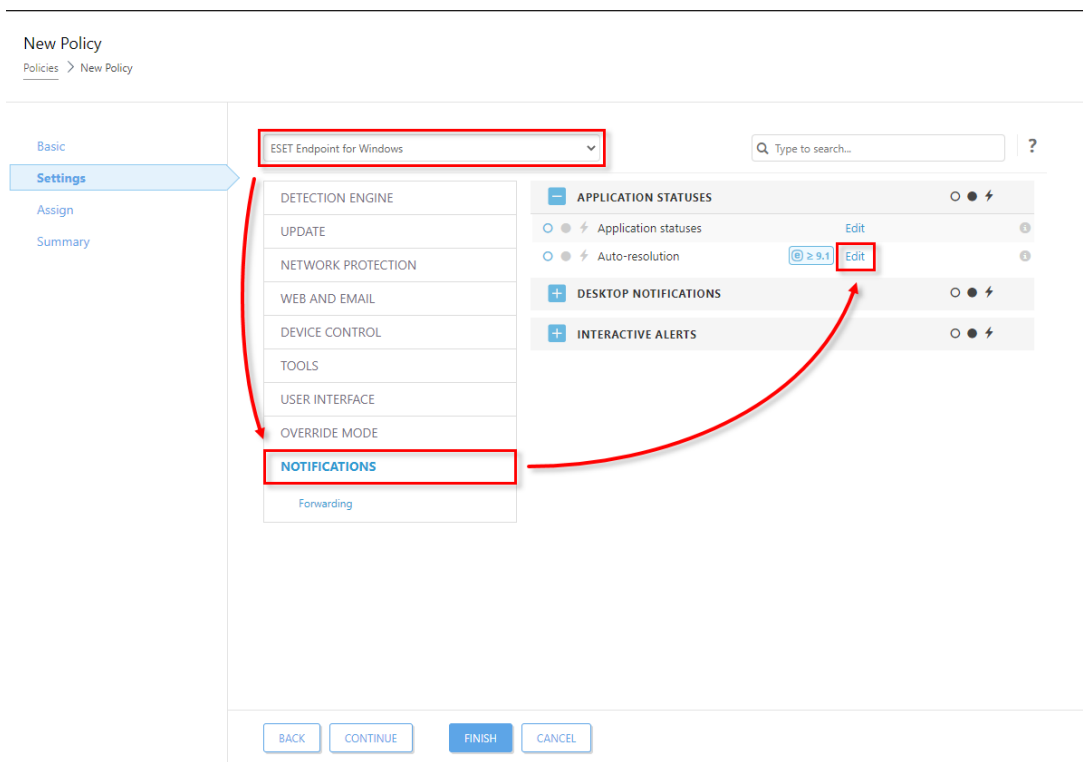

1. [Open the ESET PROTECT Web Console](#) in your web browser and log in.
2. Click **Policies** → **New policy**.

3. Type a name for your policy and click **Continue**.

4. Select **ESET Endpoint Security** from the drop-down menu. Click **Notifications** and click **Edit** next to **Auto-resolution**.

5. Next to **Device restart required**, select **Reboot** from the drop-down menu. Expand the drop-down menu in the **Postpone** column and select the preferred option. Click **OK**.

Selected situations to be remediated ? □ ×

Situation	Automatic action	Postpone
Device restart recommended Ⓜ ≥ 9.1	None ▾	Cannot postpo ▾
Device restart required Ⓜ ≥ 9.1	Reboot ▾	Cannot postpone ▾ 1 hour 3 hours 5 hours 1 day 3 days 7 days 15 days 30 days

OK Cancel

The image shows a dialog box titled "Selected situations to be remediated". It contains a table with two rows. The first row is "Device restart recommended" with a version constraint "Ⓜ ≥ 9.1", "None" as the automatic action, and "Cannot postpo" as the postpone option. The second row is "Device restart required" with a version constraint "Ⓜ ≥ 9.1", "Reboot" as the automatic action, and a list of postpone options: "Cannot postpone", "1 hour", "3 hours", "5 hours", "1 day", "3 days", "7 days", "15 days", and "30 days". Red boxes highlight the "Reboot" dropdown, the "Cannot postpone" dropdown, and the "OK" button. Red arrows point from the "Reboot" dropdown to the "Cannot postpone" dropdown, and from the "Cannot postpone" dropdown to the "OK" button.
