Issue

Create a trigger to execute Client Tasks in ESET Remote Administrator 6.3.x and later

Solution

In ESET Remote Administrator version 6.3.x and later, you must add Targets and configure a trigger after a task has been created.

After you configure the **Settings** for task creation, click **Finish** to create the task and then follow the steps below:

1. Click **Create Trigger** when you are asked if you want to add a trigger for the client task.

   > You can create a trigger later If you click Close
   >
   > To create a trigger later, go to the **Client Tasks** window and click the task that you created. Click **Run on** and continue to step 2 below.

   Figure 1-1

2. In the **Basic** section, type a name for the trigger in the **Trigger Description** field.

3. Expand **Target** and click **Add Computers** or **Add Groups** to define the target computers or groups where you want to execute the client task.

4. In the **Target** selection window, select a group to display client computers or devices in that group. Select the check box next to a group to display subgroups and clients that belong to that group in the selected targets section (see Figure 1-3 below).

5. After adding groups and clients to the selected targets section, select the check box(es) next to them in the bottom pane.

6. Click **OK** when you are finished adding computers and groups.

8. **Configure the Trigger**: Expand **Trigger** and complete the applicable event trigger settings for the task (**As Soon As Possible** is selected by default; for more information about triggers, see the Triggers topic in Online Help).

9. Click **Finish**. Your new task will display in the **Client Tasks** window.
