Deploy ESET Management Agent using Microsoft Intune / Microsoft Endpoint Manager

Mitchell | ESET Nederland - 2025-07-31 - Reacties (2) - ESET PROTECT

Prerequisites:

- Microsoft Intune environment
- Microsoft Win32 Content Prep Tool: https://github.com/Microsoft/Microsoft-Win32-Content-Prep-Tool
- ESET Protect or ESET Protect Cloud

Configuration

1. Create a configuration file for GPO or SCCM Deployment

Select the appropriate certificate and enter the password if needed. Optionally configure other settings in the advanced section, save the install_config.ini file.

2. Download the EM Agent installation package:

https://download.eset.com/com/eset/apps/business/era/agent/latest/agent_x64.msi

3. Place the agent_x64.msi and install_config in the same directory:

📙 🔄 📙 🗢 EM Agent			
File Home Share View			
\leftarrow \rightarrow \checkmark \uparrow \square > Intune > EM Agent			ٽ ~
Name	Date modified	Туре	Size
Quick access	1/8/2021 5:19 PM	Windows Installer	64,320 KB
Desktop J Desktop J Downloads	1/8/2021 5:13 PM	Configuration sett	5 KB

4. Create .intunewin package by running IntuneWinAppUtil.exe:

- 5. You can now distribute the package via intune.
- 6. Apps > Windows > Windows apps > Add > Windows App (Win32)

	Microsoft Endpoint Manager a	dmin center				류 다 @ ? @ test@S9NPCtu9g78mka Q
1	< Home	Home > Apps > Apps Windows ×	Windows Windows	apps		Select app type ×

- 14. Review the settings and click "create"
- 15. Intune will now start installing the ESET Mangement Agent on managed computers.

Dank voor de duidelijke uitleg. Wat gebeurt er als de agent via ESET Protect Cloud een update van de agent wordt uitgevoerd. Gr. Fokko Brugge

Bedankt voor je comment, je kan dus de initiële installatie via intune uitvoeren, nadien zal de agent zichzelf bijwerken naar de laatste versie en altijd in lijn (compatible) blijven met de versie van ESET PROTECT Cloud.
