# **Deploy or upgrade ESET endpoint products using ESET PROTECT**

Steef | ESET Nederland - 2021-04-23 - Reacties (0) - ESET PROTECT

#### Issue

- Upgrade ESET Endpoint Security or ESET Endpoint Antivirus to the latest version
- Deploy ESET solutions to clients remotely using the software install task or Live Installer method

#### Solution

This article applies to the following operating systems:

- 1. Open the ESET PROTECT Web Console in your web browser and log in.
- 2. Click Tasks → Operating system → Software Install → New and select Client Task.

3. In the **Basic** section, enter a **Name** and an optional **Description**. The **Task** drop-down menu will automatically be set to **Software Install**.

eser	PROTECT			Gor Computer Name		B LOGOUT     S9 min
	New Client Task					
A					_	
	Basic	$\geq$	Name			
2	▲ Settings		Install EES

			Software Install		~	
Ð			BACK CONTINUE	FINISH CANCEL		

4. Click Settings.

### Linux installations You can add the --skip-license parameter to the Installation parameters field to skip the display of the ESET End-user license agreement (EULA). If you wish to view the EULA before agreeing to it, do not use this parameter.

5. Installing a new product: If you are installing a new product, click **Select** next to **ESET license**, then select the license you will use to activate the ESET products that will be sent to the client computers and click **OK**.

Upgrading an activated product: If you are running an upgrade installation on a previously activated product, do not select the license. If you have not yet added product licenses, <u>click here for instructions</u> to add product licenses in <u>ESET PROTECT</u>.

<b>a</b> 1	BACK CONTINUE FINISH CANCEL			

6. Under **Package to install**, there are two options to select the package that will be installed on target clients.

1. To install a package from the repository: Click **<Choose package>**.

- 3. Check for the latest version of your ESET business products.
- 4. Select the check box next to I accept the terms of the application End User License Agreement and

acknowledge the Privacy Policy and proceed to step 7.

- 5. To install a package by entering the target URL:
- 6. Select Install by direct package URL and type the package URL into the corresponding field.
- 7. Check for the latest version of your ESET business products.
- 8. Select the check boxes next to I accept the terms of the application End User License Agreement and Automatically reboot when needed.

8. When prompted, click Create Trigger.

9. Enter a name for the trigger into the Trigger Description field.

- Send an activation task to the computers on which you installed ESET endpoint products so that they can begin receiving regular updates.
   If you are performing a new installation of ESET PROTECT, proceed to post installation tasks.
