## Deploy the ESET Management Agent to a macOS client using Agent Live Installer (7.x)

Anish | ESET Nederland - 2020-06-15 - Reacties (0) - 7.x

### Issue

- When deploying the ESET Management Agent Live Installer to a macOS client, the package is distributed as a .tar.gz file.
- Extract ESMCAgentInstaller.tar.gz and install the ESET Management Agent.

### Solution

Getting Started with ESMC: Step 4 of 6

← [Add Client Computers](#) | [Deploy ESET endpoint solutions](#) →

Peer certificates and Certification Authority that are created during the installation are by default contained in the Static Group All.

1. [Open ESET Security Management Center Web Console](#) (ESMC Web Console) in your web browser and log in.
2. Click **Quick Links** → **Other Deployment Options**.

**Figure 1-2**

1. Deselect the check box **Participate in product improvement program** if you do not agree to send crash reports and telemetry data to ESET. If the check box is left selected, telemetry data and crash reports will be sent to ESET.  
Click **Configuration** where you can change the **Name** for the Agent Live Installer, change **Server Hostname** (optional) and select **Parent group** where the computer will be contained after the installation (optional).
2. Click **Finish**.

**Figure 1-4**

**Click the image to view larger in new window**

1. Distribute the Live Installer file to your Apple client(s) using email, a shared network folder, or whatever means you choose. Download the file to the Desktop on your client(s).

2. After you have downloaded the file to the client(s), double-click **ESMCAgentinstaller.tar.gz** to extract the file. **ESMCAgentinstaller.sh** will be extracted to your Desktop.
3. Click **Go** → **Utilities** and then double-click **Terminal** to open a new Terminal window.

**Figure 1-6**

1. If you are performing a new installation of ESMC, proceed to Step 5, [deploy ESET endpoint products to your client computers](#).
