# Enable ESET LiveGuard Advanced on your endpoint computer in ESET PROTECT Cloud

Mitch | ESET Nederland - 2022-08-29 - [Reacties (0)](#) - [Endpoint Solutions](#)

## Issue

- Increase the level of protection of your environment with ESET LiveGuard Advanced (formerly ESET Dynamic Threat Defense)
- Submit suspicious samples to be executed and analyzed in a cloud sandbox, an isolated test environment

## Solution

1. [Import your ESET LiveGuard Advanced license into ESET Business Account](#)
2. [Synchronize ESET PROTECT with your ESET Business Account](#)
3. [Activate ESET LiveGuard Advanced license on your endpoint computers](#)
4. [Enable ESET LiveGuard Advanced license on your endpoint computers](#)

[VIDEO TUTORIAL ▶]

**I. Import your ESET LiveGuard Advanced license into ESET Business Account**

In your web browser, open [ESET Business Account](#) and log in.

Click **Licenses → Enter license key**. If you already have a license in your ESET Business Account, click **Add License → Enter license key**.
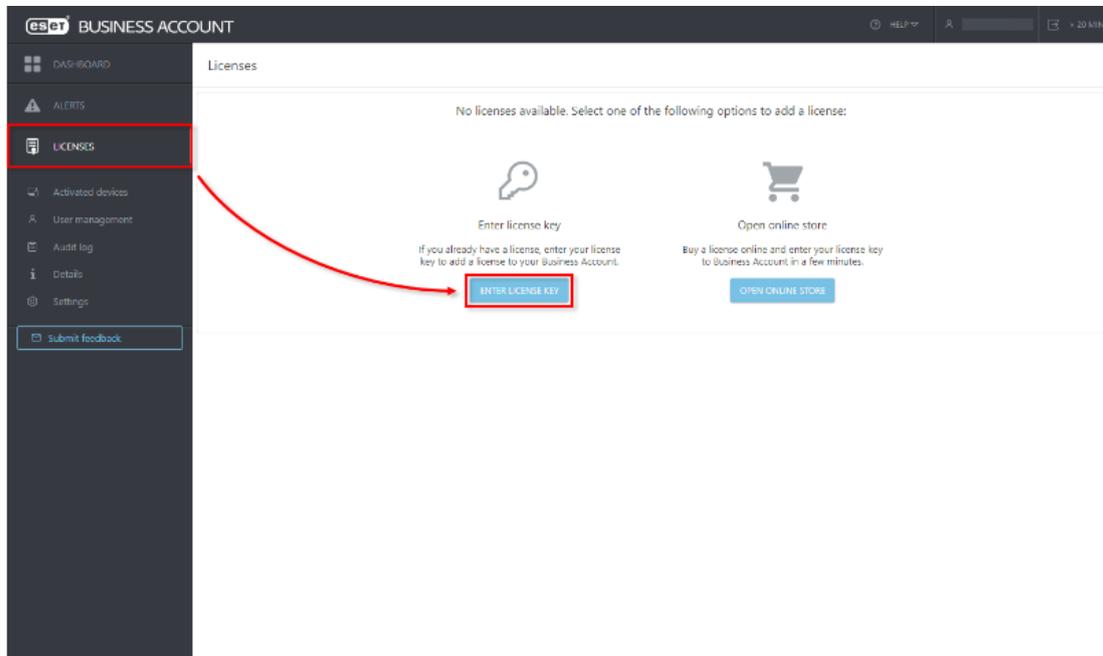

Type or copy/paste your license key and click **Add License**.

Add License

The License Key is in the confirmation email you received after buying it online. If you bought it in a store you can find the key on the license card.

License key ℹ

If you have an existing Username and Password for your ESET product, you can convert them to a license key.

ADD LICENSE

Select the check box next to **I agree to the ESET Terms of Use** and click **Verify**.

Add License

License _____ contains ESET LiveGuard Advanced. ESET LiveGuard Advanced results are shared with all computers in the company.

Please review and agree to the Terms of use to continue.

VERIFY

**II. Synchronize ESET PROTECT with your ESET Business Account**

Open ESET PROTECT Cloud Web Console in your web browser and log in.

Click **More → License Management → Actions → Synchronize Licenses**. Wait for the synchronization to finish. Your ESET LiveGuard Advanced license will appear in your licenses with the number of free seats.
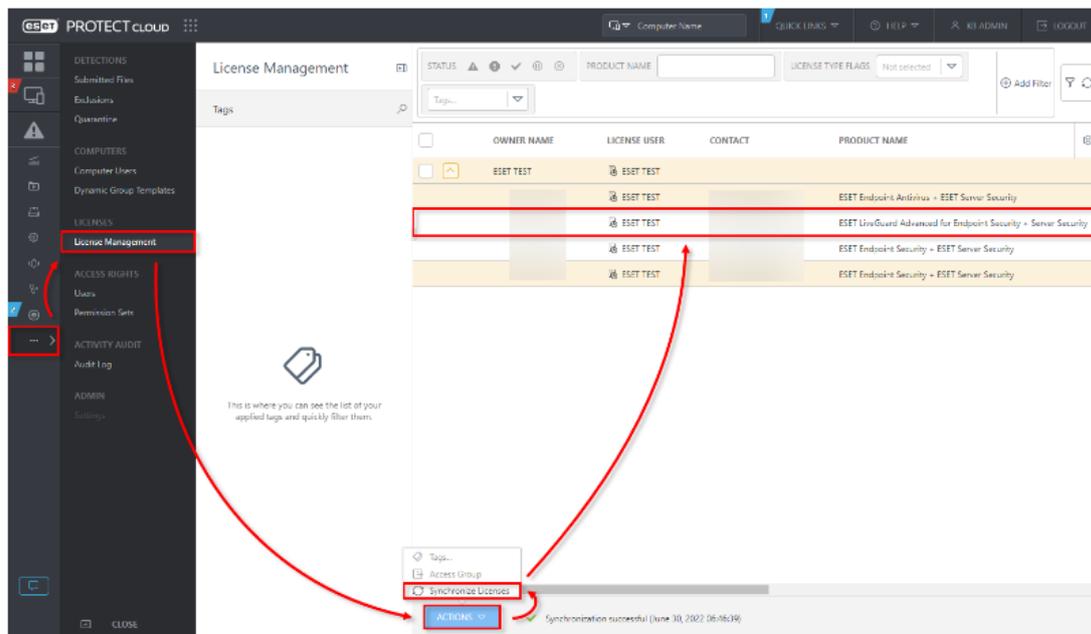

**III. Activate ESET LiveGuard Advanced license on your endpoint computers**

[Open ESET PROTECT Cloud Web Console](#) in your web browser and log in.

Click **Tasks → New → Client Task**.

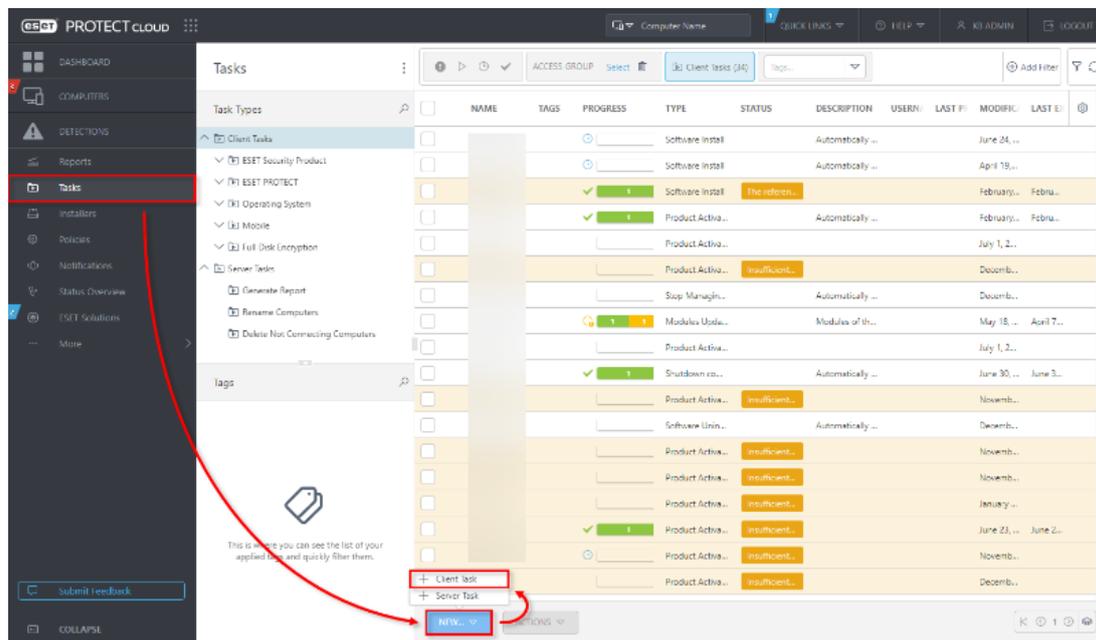

Type a name for your task (in this example, Activate ESET LiveGuard Advanced). From the **Task Category** drop-down menu, select **ESET Security Product** and from the **Task** drop-down menu, select **Product Activation**. Click **Continue**.

Click the license to change it.

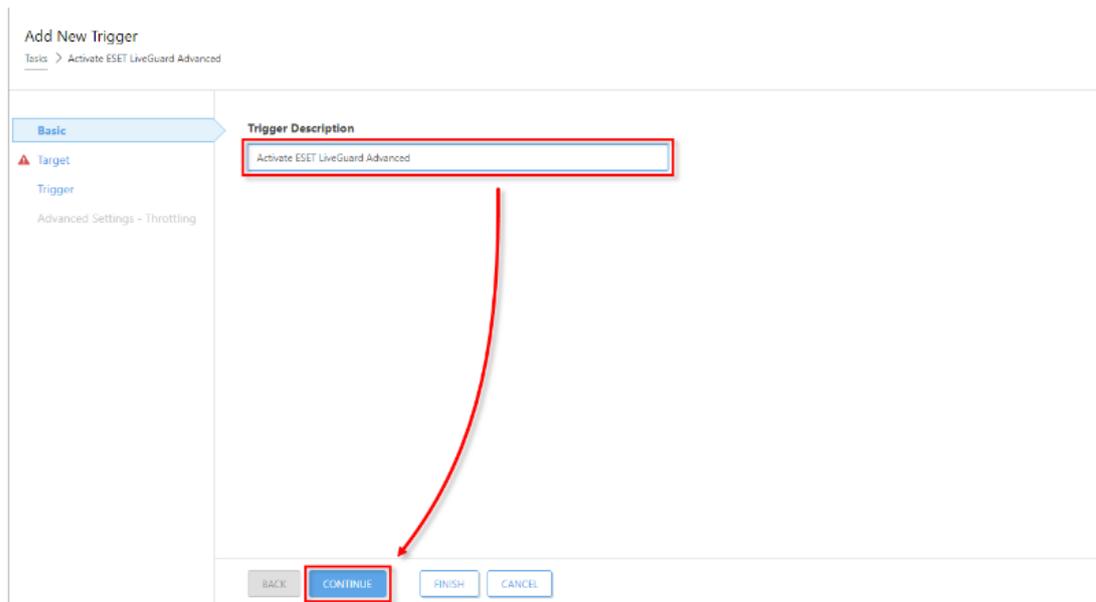

Select the check box next to **ESET LiveGuard Advanced for Endpoint Security + Server Security** and click **OK**.
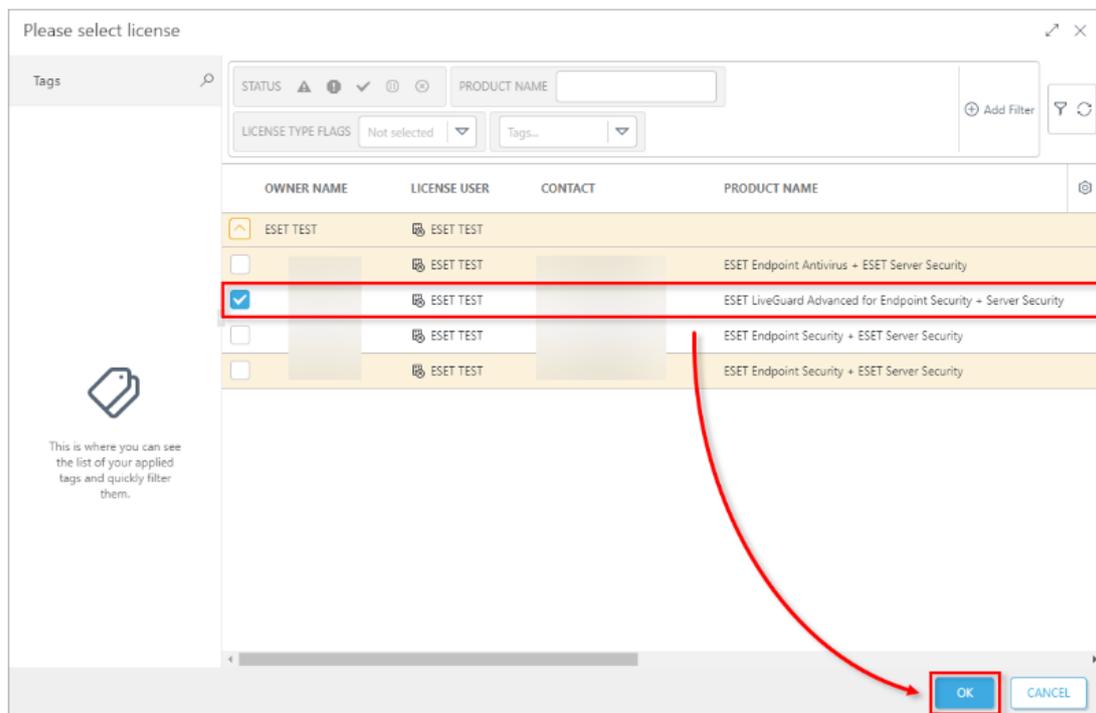

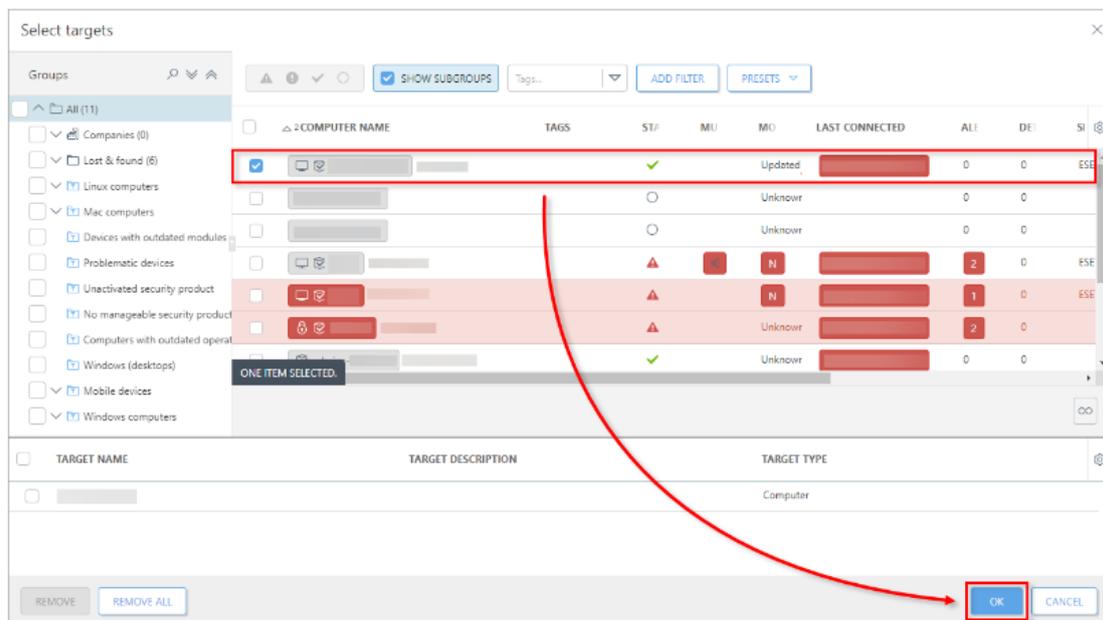

Click **Finish → Create Trigger**.

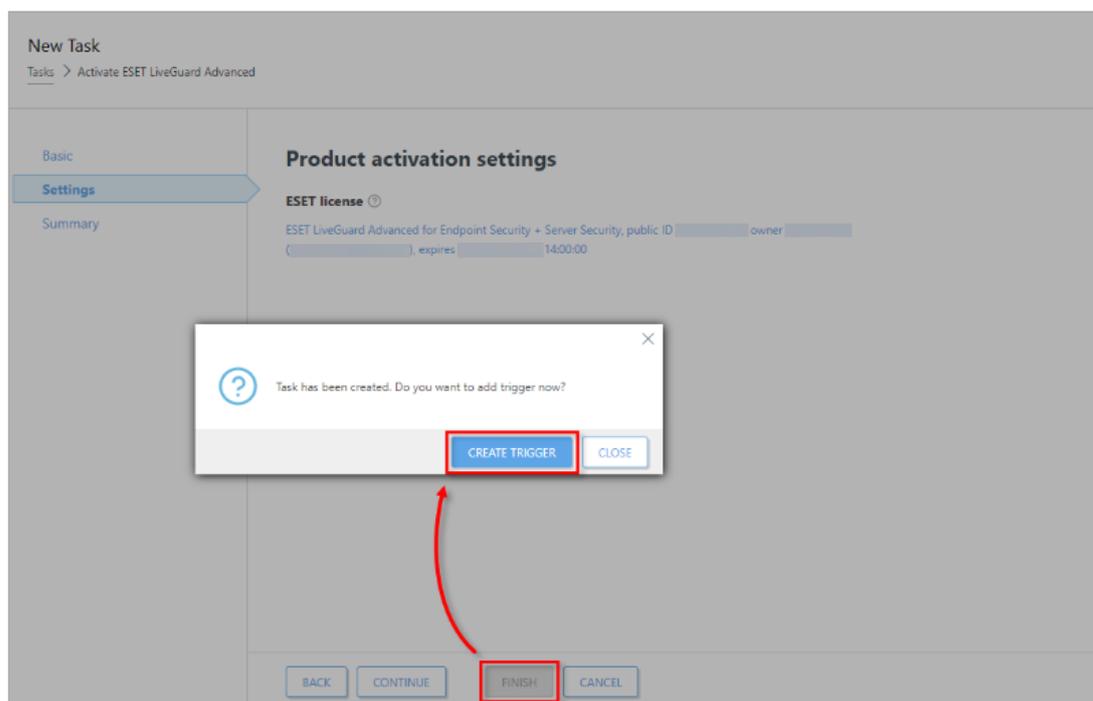

Type a name for your trigger (in this example, Activate ESET LiveGuard Advanced) and click **Continue**
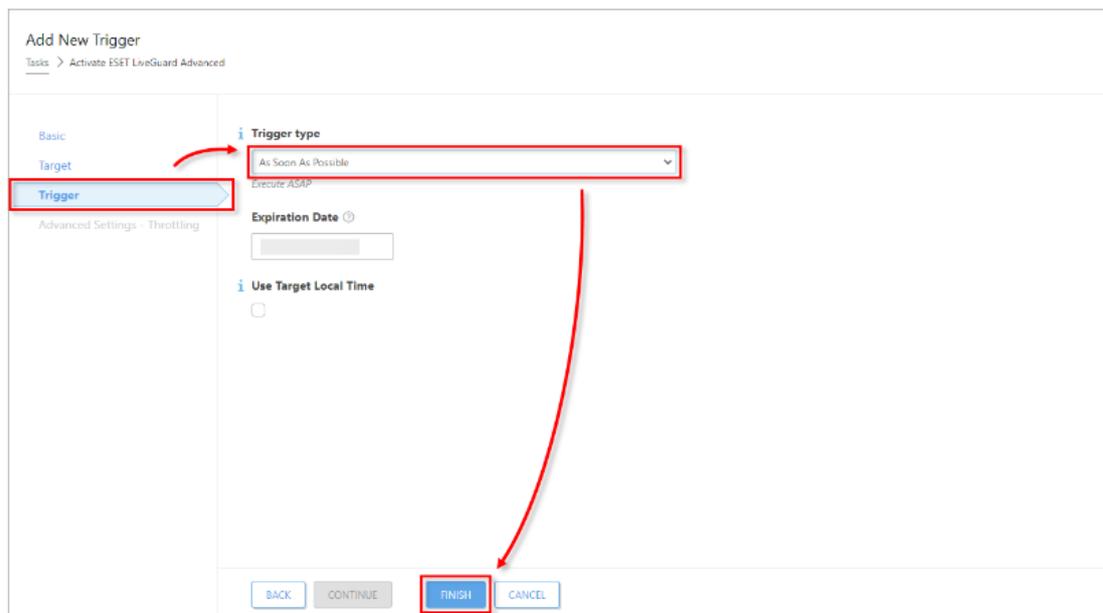

Click **Add Targets**.

Select the check box next to the computer or computer group you want to activate ESET LiveGuard Advanced and click **OK**.

Click **Trigger**. From the **Trigger type** drop-down menu, select the appropriate option and click **Finish**. The task will be scheduled and ESET LiveGuard Advanced will activate on the selected computers.

# Enable ESET LiveGuard Advanced license on your endpoint computers

Click **Policies**, select the check box next to **ESET LiveGuard Advanced - Submit scripts and executables - Recommended** for the ESET endpoint product you are using (in this example, **ESET Endpoint for Windows**) and click **Assign → Assign computers** or **Assign groups**
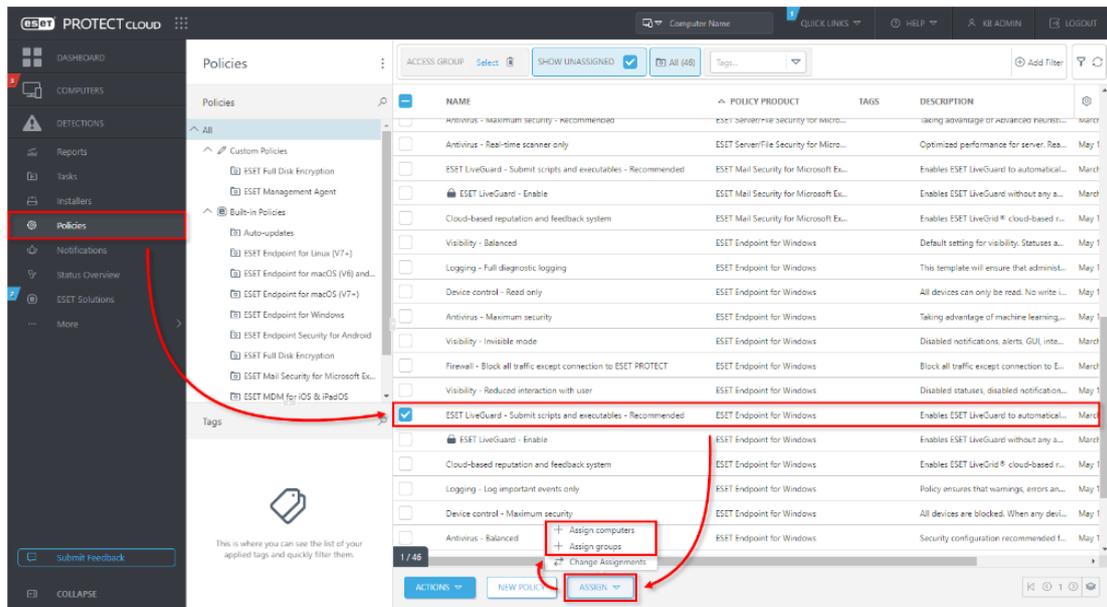

Select the check box next to the computer or computer group you want to activate ESET LiveGuard Advanced and click **OK**.

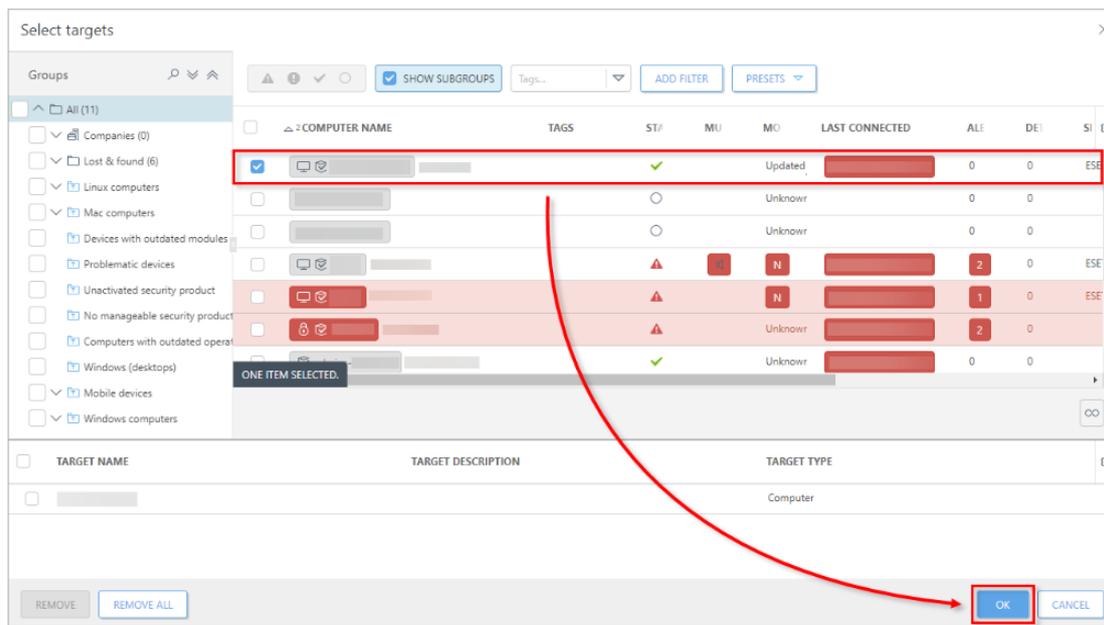

ESET LiveGuard Advanced will be activated on the selected endpoint computers. Repeat the steps in this section for every ESET endpoint product separately.
