

# Export logs to Syslog server from ESET PROTECT (8.x-10.x)

Mitch | ESET Nederland - 2023-03-10 - [Reacties \(0\)](#) - [ESET PROTECT Cloud](#)

## Solution

1. Open the [ESET Protect Web Console](#) in your web browser and log in.

1. Click **More** → **Server Settings** and expand **Advanced Settings**.

1. In the **Syslog Server** section:

- a. Next to **Use Syslog server**, click the toggle to enable it.
- b. In the **Host** field, type the IP address or hostname for the destination of Syslog messages.

c. In the **Port** field, the default value is set to 514.

1. In the **Logging** section, click the toggle next to **Export logs to Syslog** to enable it and click **Save**.

**STATIC GROUPS**

Automatically pair found computers

Enables automatic pairing of found computers to computers already present in static groups. Pairing works on reported hostname by agent and if it can not be trusted then it should be disabled. If pairing fails computer will be placed into Lost and Found group.
