Export logs to Syslog server from ESET PROTECT (8.x-10.x)

Mitch | ESET Nederland - 2023-03-10 - Reacties (0) - ESET PROTECT Cloud

Solution

1. Open the [ESET Protect Web Console](#) in your web browser and log in.

1. Click **More → Server Settings** and expand **Advanced Settings**.

1. In the **Syslog Server** section:

a. Next to **Use Syslog server**, click the toggle to enable it.

b. In the **Host** field, type the IP address or hostname for the destination of Syslog messages.

c. In the **Port** field, the default value is set to 514.

1. In the **Logging** section, click the toggle next to **Export logs to Syslog** to enable it and click **Save**.

The screenshot shows the 'Server Settings' dialog box. At the top, there is a search bar and a help icon. Below it, there are fields for 'Host', 'Username', 'Password' (with a 'Show password' link), and 'Root container'. The 'SYSLOG SERVER' section is highlighted with a red box and contains the following fields:

- 'Use Syslog server' checkbox (checked)
- 'Host' input field: 10.0.0.0
- 'Port' input field: 514
- 'Format' dropdown: BSD
- 'Transport' dropdown: UDP
- 'Octet-counted framing' checkbox (unchecked)

The 'STATIC GROUPS' section includes an 'Automatically pair found computers' checkbox (checked). The 'REPOSITORY' section has a 'Server' dropdown set to 'AUTOSELECT'. The 'PRODUCT IMPROVEMENT PROGRAM' section has a 'Participate in product improvement program' checkbox (unchecked). The 'LOGGING' section includes a 'Trace log verbosity' dropdown set to 'Warning' and an 'Export logs to Syslog' checkbox (checked). A red box highlights the 'Export logs to Syslog' checkbox, and a red circle with the number '3' is placed above it. A red arrow points from the 'SAVE' button at the bottom left to the 'Export logs to Syslog' checkbox. The 'Exported logs format' dropdown is set to 'JSON'. The 'SAVE' and 'CANCEL' buttons are located at the bottom left of the dialog.

1. For a detailed list of the format and meaning of attributes of all exported events (Threat events, ESET Firewall events, HIPS events, Audit events, Enterprise Inspector alert events), visit the [Export logs to Syslog Online Help topic](#).
